' , , .

Experience

MBU Devs
Full Stack MERN Developer
March 2026 - Present (6 months)
United States

- Developed responsive and scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Built secure RESTful APIs with JWT Authentication and Role-Based Access Control (RBAC).
- Designed modern, responsive user interfaces focused on performance, accessibility, and user experience.

- Integrated MongoDB databases and third-party APIs to deliver production-ready business solutions.
- Deployed and maintained applications on AWS EC2 using Docker, Nginx, PM2, Linux, and Git-based deployment workflows.
- Improved website performance through optimization techniques and Technical SEO best practices.
- Collaborated using Git and GitHub while following clean architecture, modular development, and modern software engineering practices.
- Contributed to scalable web applications with a focus on maintainability, security, and cloud deployment.

Contract Bazaar

Analytics & Monitoring

March 2026 - May 2026 (3 months)

Lahore District

Analyzed website performance using Google Analytics 4, Search Console, Log File Analysis, and traffic monitoring tools to identify optimization opportunities, supporting continuous website improvements.

Digis, a Fiverr company (NYSE: FVRR)

Full Stack Development

October 2025 - February 2026 (5 months)

Lahore

- Built responsive full-stack business applications using React.js, Node.js, Express.js, MongoDB, and REST APIs to solve customer workflow and operational challenges, delivering secure, scalable, and production-ready solutions.
- Developed secure backend APIs with JWT authentication and role-based access control (RBAC) to protect business data and streamline user management.
- Deployed and maintained applications on AWS EC2 using Docker, Nginx, Linux, and CI/CD workflows, ensuring reliable production deployments.

- Optimized website performance using PageSpeed optimization, image optimization, Cloudflare, caching strategies, and Technical SEO to improve speed, user experience, and search visibility.
- Integrated third-party APIs, payment gateways, and cloud services to extend application functionality and support business requirements.
- Collaborated with Git and GitHub using clean architecture and modular development practices to build maintainable and scalable software.
